# CONTENTS

## VOLUME 115 · NUMBER 1 · JANUARY 2000

1 Olaf Sparre Andersen. Editorial

3 D.A. Kraaij, H. Sperkreijse, and M. Kamermans. The nature of surround-induced depolarizing responses in goldfish cones

17 Yuanlin Song, Tonghui Ma, Michael A. Matthay, and A.S. Verkman. Role of aquaporin-4 in airspace-to-capillary water permeability in intact mouse lung measured by a novel gravimetric method

29 Eduardo Perozo. *Commentary:* Structure and packing orientation of transmembrane segments in voltage-dependent channels: Lessons from perturbation analysis

33 Yingying Li-Smerin, David H. Hackos, and Kenton J. Swartz. α-Helical structural elements within the voltage-sensing domains of a $K^+$ channel

51 Kwang Hee Hong and Christopher Miller. The lipid–protein interface of a *Shaker* $K^+$ channel

59 Akinori Kuruma and H. Criss Hartzell. Bimodal control of a $Ca^{2+}$-activated $Cl^-$ channel by different $Ca^{2+}$ signals

81 Ronald A. Li, Patricio Vélez, Nipavan Chiamvimonvat, Gordon F. Tomaselli, and Eduardo Marbán. Charged residues between the selectivity filter and S6 segments contribute to the permeation phenotype of the sodium channel

## VOLUME 115 · NUMBER 2 · FEBRUARY 2000

93 Gary G. Wilson, Juan M. Pascual, Natasja Brooijmans, Diana Murray, and Arthur Karlin. The intrinsic electrostatic potential and the intermediate ring of charge in the acetylcholine receptor channel

107 John G. Starkus, Stefan H. Heinemann, and Martin D. Rayner. Voltage dependence of slow inactivation in *Shaker* potassium channels results from changes in relative $K^+$ and $Na^+$ permeabilities

123 Seema K. Tiwari-Woodruff, Meng-chin A. Lin, Christine T. Schulteis, and Diane M. Papazian. Voltage-dependent structural interactions in the *Shaker* $K^+$ channel

139 A. González, W.G. Kirsch, N. Shirokova, G. Pizarro, M.D. Stern, and E. Ríos. The spark and its ember: Separately gated local components of $Ca^{2+}$ release in skeletal muscle

159 Philip A. Knauf, Nancy Mendoza Raha, and Laurie J. Spinelli. The noncompetitive inhibitor WW781 senses changes in erythrocyte anion exchanger (AE1) transport site conformation and substrate binding

175 Henry M. Colecraft, Parag G. Patil, and David T. Yue. Differential occurrence of reluctant openings in G-protein–inhibited N- and P/Q-type calcium channels

193 Carlos Gonzalez, Eduardo Rosenman, Francisco Bezanilla, Osvaldo Alvarez, and Ramon Latorre. Modulation of the *Shaker* $K^+$ channel gating kinetics by the S3–S4 linker

209 J.B. Sørensen, A. Cha, R. Latorre, E. Rosenman, and F. Bezanilla. Deletion of the S3–S4 linker in the *Shaker* potassium channel reveals two quenching groups near the outside of S4

223 David C. Gadsby. The 53rd annual meeting and symposium of the Society of General Physiologists: New optical methods in cell physiology

227 Acknowledgment

## VOLUME 115 · NUMBER 3 · MARCH 2000

229 John S. Mitcheson, Jun Chen, and Michael C. Sanguinetti. Trapping of a methanesulfonanilide by closure of the HERG potassium channel activation gate

241 Don-On Daniel Mak, Sean McBride, Viswanathan Raghuram, Yun Yue, Suresh K. Joseph, and J. Kevin Foskett. Single-channel properties in endoplasmic reticulum membrane of recombinant type 3 inositol trisphosphate receptor

257 Lidia M. Mannuzzu and Ehud Y. Isacoff. Independence and cooperativity in rearrangements of a potassium channel voltage sensor revealed by single subunit fluorescence

269 Youxing Jiang and Roderick MacKinnon. The barium site in a potassium channel by x-ray crystallography

273 Bruce P. Bean. *Commentary:* Modulating modulation

277 Curtis F. Barrett and Ann R. Rittenhouse. Modulation of N-type calcium channel activity by G-proteins and protein kinase C

287 Donghee Kim and Apisate Pleumsamran. Cytoplasmic unsaturated free fatty acids inhibit ATP-dependent gating of the G protein–gated $K^+$ channel

305 Horia Vais, Martin S. Williamson, Susannah J. Goodson, Alan L. Devonshire, Jeffrey W. Warmke, Peter N.R. Usherwood, and Charles J. Cohen. Activation of *Drosophila* sodium channels promotes modification by deltamethrin: Reductions in affinity caused by knock-down resistance mutations

319 Chih-Yung Tang, Francisco Bezanilla, and Diane M. Papazian. Extracellular $Mg^{2+}$ modulates slow gating transitions and the opening of *Drosophila* ether-á-go-go potassium channels

339 Mary D. Womack, Jeffery W. Walker, and Kamran Khodakhah. Impaired calcium release in cerebellar Purkinje neurons maintained in culture

347 Leonard K. Kaczmarek. *Commentary:* Mitochondrial memory banks: Calcium stores keep a record of neuronal stimulation

351 Stephen L. Colegrove, Meredith A. Albrecht, and David D. Friel. Dissection of mitochondrial $Ca^{2+}$ uptake and release fluxes in situ after depolarization-evoked $[Ca^{2+}]_i$ elevations in sympathetic neurons

371 Stephen L. Colegrove, Meredith A. Albrecht, and David D. Friel. Quantitative analysis of mitochondrial $Ca^{2+}$ uptake and release pathways in sympathetic neurons: Reconstruction of the recovery after depolarization-evoked $[Ca^{2+}]_i$ elevations

389 Correction

VOLUME 115 · NUMBER 4 · APRIL 2000

391 Han Choe, Henry Sackin, and Lawrence G. Palmer. Permeation properties of inward-rectifier potassium channels and their molecular determinants

405 Irena Levitan, Aimee E. Christian, Thomas N. Tulenko, and George H. Rothblat. Membrane cholesterol content modulates activation of volume-regulated anion current in bovine endothelial cells

417 Sjur Olsnes and Pål Ø. Falnes. *Commentary:* Probing pores with peptide plugs: Topology of membrane-inserted diphtheria toxin

421 Lisa Senzel, Michael Gordon, Robert O. Blaustein, K. Joon Oh, R. John Collier, and Alan Finkelstein. Topography of diphtheria toxin's T domain in the open channel state

435 Chien-Jung Huang, Isabelle Favre, and Edward Moczydlowski. Permeation of large tetra-alkylammonium cations through mutant and wild-type voltage-gated sodium channels as revealed by relief of block at high voltage
